# COVID-19 Testing and Screening

OC COVID-19 Testing Network

The following locations offer FDA-authorized COVID-19 testing to Orange County residents
who have symptoms of COVID-19. This test identifies if you are currently infected based upon a sample taken with a swab. It is not a blood test, nor does it test for antibodies. The most common symptoms of COVID-19 are fever, cough and shortness of breath. You will receive a medical assessment before being tested and you will only be tested if you have symptoms of the disease.
There is no out-of-pocket cost to you for this testing, however your insurance may be billed. You are asked to contact your medical provider first and only access these services if you do not have a provider or your provider is unable to provide testing.

Because of continued challenges of obtaining testing supplies and Personal Protective
Equipment (PPE) for health care providers conducting tests, testing may be restricted at times to high priority groups, as defined by the California Department of Public Health or Orange County Public Health.

You MUST make an appointment for testing with one of the clinics below to assure
eligibility and availability of testing.
